"JumpSTART" Pediatric Triage

©Lou Romig MD, 2002

Red: Priority 1

- Respirations < 15 or >45
- Apneic & breathes after opening airway
- Breathes after 5 rescue breaths
- No pulse w/ RR 15-45
- Unresponsive / Inap. pain response
- Uncontrolled Bleeding

Yellow: Priority 2

- Can't walk; RR 15-45; + pulse;
"A", "V" or appropriate pain response

Green: Priority 3

- Can walk: "Walking Wounded"
- May be infants that appear to have no major injuries
- Direct to a *specific location* for secondary triage

Black: Priority 0

- No breathing after airway opened and 5 rescue breaths given
- No respiration & no palpable pulse

Remember: START is only for initial triage!!! ALL patients MUST be re-evaluated for life-threatening and other injuries using secondary triage
