

# NORTHWEST COMMUNITY EMS SYSTEM - Drug/Supply/Equipment List

## Last revised: 11/1/22 Rev.

- KEY:** ALS Required on all ALS vehicles unless specified otherwise. All other items are required on BLS and ALS vehicles.
- \* Drugs identified by an asterisk (\*) are controlled substances and must be stored and accounted for per system policy.
- \*\* System hospitals must replace all drugs, supplies, and equipment items **EXCEPT** those items indicated by a double asterisk (\*\*). These items must be purchased and/or maintained by the EMS provider agency.
- IL required by IDPH administrative code section 515.830

- EMS agencies shall assign appropriate personnel to inventory ambulances **daily** at shift change to ensure complete par levels, intact packaging, current dates, and good working order. All controlled substances must be viewed and counted daily per policy.
- The EMS MD or designees will do random unannounced ambulance inspections to measure compliance with these standards.
- All EMS products exchanged at hospitals must be LATEX- FREE. All non-exchange items must be latex-free unless a waiver has been granted and a latex-containing kit is maintained. Contain latex: Do NOT use without covering equipment or patient: BP cuffs, stethoscopes, Nellcor pulse oximeter.
