

Dear GD Customer,

We are issuing this advisory in the light of the recent **ongoing cybersecurity breach involving Stryker**.

While GD's email tenant has safeguards and monitoring controls in place, **out of an abundance of caution**, we are temporarily disabling all 12-lead emails from Stryker LIFEPAKS and devices. We will send a notification as soon as we are certain all risk is alleviated and functionality is restored.

Until further notice, please **do not open, click or download any email attachment received from LIFENET Systems on your CAREpoint 3 system**. This measure is being taken due to the ongoing investigation into the Stryker security incident.

Our teams are actively monitoring the situation and will provide further updates once it is confirmed that normal communications can safely resume. We appreciate your cooperation as we take these precautionary measures to protect your systems and information.
