

Currently Licensed Paramedics in good standing in the NWC EMSS

Seeking NREMT Paramedic Certification: 2023

If you are currently licensed as a paramedic in Illinois, are a Northwest Community EMS System (NWC EMSS) member in good standing, and meet NREMT eligibility requirements, you may voluntarily seek NREMT registration via written and practical testing. One requirement is to submit documentation verifying completion of **CE** that meets all requirements of the current National Component of the 2016 National Continued Competency Program within the past two years as approved by the EMS MD (5-2021 to 5-2023). <https://www.nremt.org/Document/Paramedic-State-Licensed> . See System memo 413 for details.

The NREMT accepts State EMS Office approved and CAPCE accredited education, education from EMS education programs, and U.S. accredited academic credit or college course. All education must be directly related to EMS patient care. You may count education received in lectures, standardized courses (such as ABLS, ACLS, EMPACT, PEPP, PALS, PHTLS, ITLS, etc.), college courses, in-service training, case reviews, conferences, etc.

Complete this Proof of CE form and submit to cmattera@nch.org before making application to the NREMT
