

Northwest Community EMS System – Supplemental to IDPH BLS form		Date of inspection:
ALTERNATE RESPONSE VEHICLE Inspection Form		
Provider Agency:		VIN number (last 4):
Level of care ☐ ALS ☐ ILS ☐ BLS		Local ID number:

State standard BLS Supplies: **(USE IDPH NT inspection form)**

# present	# needed	Products must meet the specifications listed on the EMS Drug and Supply list
	2	IDPH required bandages: Vaseline gauze 3" X 8" Preferred alternative: plastic wrap or vented/channeled chest seal
	1 device	Glucose meter (Microdot) and test strips (bottle of 50 strips and high/low testing solution), and at least 2 lancets. Must be tested, logged, & maintained per System policy.
	1	ResQPod impedance threshold device (ITD)
	2	Tourniquet : Disposable Combat Application Tourniquet, TMT or approved equivalent
Medications/Drugs - BLS		
	4 tabs	Acetaminophen PO Chewable tablet 160 mg or liquid equivalent
	1 ea	Albuterol 2.5 mg /3 mL (0.083%) Ipratropium 0.02% 0.5 mg/2.5 mL NS HHN and adaptors to deliver using BVM
	4 ea	ASA chewable 81 mg tablets for chest pain of suspected ischemic origin
	2	Diphenhydramine 50 mg tablets
	Supplies for 2 injections	Epinephrine 1 mg/1 mL vial with (2) 0.5 mL syringes (if available) or (2) 1 mL syringes and (2) 21 or 22 g needles for IM injection
	1	Glucagon 1 mg for IN or IM administration
	4 mg total	Naloxone 2 mg/2 mL; with (4) 1 mL syringes; (4) 21 or 22 g needles; may give IM or IN
	1 bottle	Nitroglycerin 0.4 mg (1/150 gr) tabs for suspected ischemic chest pain
	2	Ondansetron 4 mg ODT
	2	Medication atomization devices (MAD) for mucosal drug delivery
Optional BLS		
	1	<i>Automated CPR device as approved in Drug and Supply List</i>
Medications/Drugs/Supplies – ILS: Above plus the following:		
	2	Normal saline 1000 mL bags IV fluid (no un-warmed fluids to pt. w/severe trauma or shock)
	1 each	IV catheter over the needle devices (protected): 14, 16, 18, 20 gauge (saline lock OK for IV meds only)
	2	IV tubing: regular drip
	1	IV tubing: microdrip (Peds patients)
	2	IV protective dressings
	4 each	CHG/IPA skin preps
	1	Point of use sharps container (lg)
	1 ea	Selective drugs by IO (already placed) and IV routes (SOP initial dose): diphenhydramine; dextrose 10% 25 Gm /250 mL premix IVPB, ondansetron
	1 ea	Selective drugs (SOP initial dose) by IO (already placed) and IVP routes if vehicle has a cardiac monitor with viewable ECG tracing, ETCO₂ and SPO₂ : adenosine, amiodarone, atropine sulfate, benzodiazepines, fentanyl (optional), lidocaine 2%

ALS approved equipment (medication storage box with temperature/environmental control standards for medication storage), airway equipment, cardiac monitor/defibrillator with oximetry and 12 L ECG capability and medications" as below:

NWC EMSS – Supplemental to IDPH BLS form ALTERNATE RESPONSE VEHICLE Inspection form	
Provider Agency:	VIN number (last 4):
Level of care ☐ ALS ☐ ILS ☐ BLS	Local ID number:

Medications/Drugs – In addition to above, ALS NT vehicles are required to carry the following, but PMs/PHRNs on an ALS alternate response vehicle may give all medications by all routes and doses specified for ALS in the SOPs if available and full ALS monitoring and resuscitation equipment is available to them

# present	# needed	ALS Products must meet the specifications listed on the EMS Drug & Supply list
	1	Adenosine 6 mg / 2 mL
	2	Amiodarone 150 mg/3 mL
	2	Atropine 1 mg / 10 mL preload
	3	Epinephrine (1 mg/10 mL)
	1 (Opt)	Fentanyl 100 mcg / 2 mL – Optional CONTROLLED Substance
	1	Ketamine 500 mg/10 mL (50 mg/mL concentration) CONTROLLED Substance
	1	Midazolam 10 mg/2 mL – CONTROLLED substance
	1	Norepinephrine 4 mg / 4 mL (vial preferred)
	1	Verapamil 5 mg
	1	10 g; catheter over the needle device; 3 or 3.25" long pleural decompression
	1	10-14g catheter for needle cric
	1 each	i-gel® supraglottic airway (same sizes required on ALS ambulances)
	1	Choking kit: (If ProVu not carried: 1 standard laryngoscope handle, with 1 Miller size #1 disposable blade – NOT to be used for ETI); Magill or curved uterine forceps
	1 ea	Syringes: 1 mL; 3 mL; 10-12mL; 20mL with needles
	1	Cardiac monitor/defibrillator equipped with adult and pediatric size defibrillation pads capable of external pacing; <i>SpO₂</i> ; <i>ETCO₂</i> ; <i>12-lead ECG</i> . IDPH will grant a one-year waiver for monitor/defibrillators that do not meet full ALS-capable standards on an ALS NT vehicle
	20	ECG electrodes (rhythm analysis) and 1 pace/defib pad; washcloth/towel and alcohol pads for skin prep
	Optional ALS	
	1 ea	EZ-IO driver plus 45 mm (Yellow); 25 mm (Blue); 15 mm (Pink) 15 g needles kits each with stabilizer
	1	Sapphire infusion pump (required to give IV acetaminophen to children) + (2) AP403 infusion sets Pump must be configured with System standard master drug library prior to deployment.
	1 set	ProVu video laryngoscopy equipment per ALS ambulance inventories
	Must have if ProVu carried	2 each 6 or 6.5 mm, 7 or 7.5 mm, cuffed for use with ProVu hyperacute non-channeled blade Commercial ETT holders; Battery operated suction unit with DuCanto catheters
